Dear Ms. Oliver:

Kaney Transportation, Inc. would like to revert their status back to a small quantity generator.

We have shipped the 500 gallons of dirty xylene we had accumulated.

We are discontinuing this practice of using xylene for cleaning.

Sincerely;

Dear Ms. LoPinto:

This letter is in response to that received from Mr. Robert A. Wengrow asking us for verification of the fact that we are a small quantity generator.

We do qualify for the small quantity exemption because we do not store in excess of 1,000 kilograms of hazardous waste, as outlined in your administrative code 721.105 (F).

Yours truly,

Dear Sir:

This letter is in response to yours dated September 28 with regard to the TSD Notification without Part A Application.

We no longer treat or store hazardous material so therefore are not a TSD facility. We are a generator who uses an outside facility to treat or reclaim any waste that we may have generated. For that reason we do wish to keep our ID number.

Yours truly,

KANEY TRANSPORTATION, INC.

RE: TSD Notification without  
Part A Application

Dear Notifier:

The United States Environmental Protection Agency (U.S. EPA) has received your notification of hazardous waste activity. On that form, by checking the "treat/store/dispose" (TSD) box, you indicated that you are a hazardous waste management facility (HWMF). To date, however, we have no record of having received Part A application for a hazardous waste permit which is required for all HWMFs.

Federal regulations require owners and operators of existing HWMFs (installations which treat, store, or dispose of hazardous waste) to have submitted a Part A permit application to the Regional Administrator by November 19, 1980, in accordance with 40 CFR 122.22. This requirement applied to HWMFs which were in existence on or before November 19, 1980. New facilities (those established after November 19, 1980) are required to submit Part A and Part B of their permit application, and receive a Resource Conservation and Recovery Act (RCRA) permit before beginning physical construction.

If your facility treats, stores, or disposes of hazardous waste, then your facility is operating without a hazardous waste permit, in violation of Section 3005 of RCRA, as amended. This violation is considered serious by the U.S. EPA, and may subject you to Federal enforcement under Section 3008 of RCRA for past and continued non-compliance.

Please submit your completed Part A application to the address below within fifteen days of receipt of this letter:

We are aware that some hazardous waste handlers may have marked the TSD box on the notification form as a precaution or as a result of misunderstanding the May 19, 1980, hazardous waste regulations. If you notified us as a TSD in error, or if your status as a treatment, storage, or disposal facility has changed, please advise us in writing immediately.

Please contact Arthur Kawatachi of my staff at (312) 353-2197, if you have any questions regarding this letter.

Sincerely yours,

Gentlemen:

We filed a precautionary notification because we were uncertain whether or not we were subject to the hazardous waste regulations.

It is our considered opinion now that we are not subject to these regulations. While we do have a holding pond, the only thing that is discharged into this pond is the external washing of our motor vehicle equipment. In other words this would amount to no more than wash water and the road grime which is washed from the unit.

If you need further information, or if in your opinion we do come under these regulations, please advise so that we might comply.

Thank you.

Yours truly,

KANEY TRANSPORTATION, INC.
